

Support Your APPs and Improve Patient Access to Care

# ThriveAP In-Person Skills Workshop for Primary Care

The **ThriveAP Skills & Procedures Workshop** provides hands-on direction for NPs and PAs at any point in their career, covering the most common revenue-generating skills and procedures performed in outpatient primary care. Our Primary Care focus is on common dermatological and musculoskeletal procedures and reviews skills that are often underutilized, referred elsewhere, or documented and billed inaccurately, causing a loss in revenue and a lack of access for patients.

## Activities Include:

- EKG Interpretation
- Wound Care and Closure
- Dermatological Procedures
- Foreign Body Removals
- MSK: Arthrocentesis, joint injections, and trigger point injections

*We collaborate to ensure review of the most applicable procedures*

## Each Participant Receives:

- Instructional handbook covering all reviewed skills and procedures
- Hands-on training by experts, using the latest simulation devices
- Current, accurate documentation for billing & coding of procedures
- 8 contact hours, approved by ANCC, AAPA, and AMA. Activity ID: 18692

*"Very knowledgeable providers teaching the course, enjoyed the simulation practice throughout the course. Covered several pertinent procedures."*

## Live Presenters

Anna L. Carlini,  
DMSc, PA-C

Rachel Helms DNP, APRN,  
AGACNP-BC, FNP-BC, ENP-C
